## INTERESTS

**Computing:** I always been interested in computers, when I was a kid, I used to spend time at my brother's computer, trying to learn something new about upcoming features. During high school, I studied the fundamentals of informatics and microsoft office, then I decided to study animation, movies and video editing.  
I am currently spending most of my time improving my programming skills and always learning something new.

**Hobbies:** I spent part of my free time travelling or finding informations about new places, watching and playing football, watching movies or series.

**Additional Info:** UK Settled Status, Driving license cat. B

## PERSONAL PROFILE

Throughout my career, I have had the opportunity to work in various countries and industries, and each role has provided unique insights and valuable learning experiences. Through this diverse range of experiences, I have honed my ability to work effectively as a team member or independently, while also sharpening my attention to detail, self-motivation, judgement, and problem-solving skills.

I am confident that these transferable skills will enable me to thrive in any future role.

I recently completed a software development bootcamp, where I gained proficiency in multiple programming and database languages.

This training has provided me with a strong foundation and practical experience in the field.

As I embark on the next chapter of my career, I am eager to join a company where I can leverage my skills to help achieve business objectives and continue to expand my knowledge.
